✓ 550.6 G4
v.47pt.1

CONTENTS

JANUARY

Page

Opaque oxides and sulphides in common igneous rocks; by W. H. Newhouse.... 1
Geology of the Cananea Mountains, Sonora, Mexico; by Wilbur G. Valentine.. 53
Heat conduction in dissimilar rocks and the use of thermal models; by T. S. Lovering 87
Tomichi Dome flow; by J. T. Stark and C. H. Behre, Jr..... 101
Pliocene volcanoes of the Navajo-Hopi country; by Howel Williams..... 111

FEBRUARY

Cyclic and non-cyclic aspects of erosion; by Nevin M. Fenneman..... 173
Geological education; by Charles K. Swartz..... 187
Petrology of the Shawinigan Falls district; by F. Fitz Osborne..... 197
Middle Cambrian formations of the Providence and Marble Mountains, California; by John C. Hazzard and John F. Mason..... 229
Triassic and Lower Jurassic formations of west central Nevada; by Siemon W. Muller and Henry G. Ferguson..... 241
Sylvania sandstone of northwestern Ohio; by J. Ernest Carman..... 253
Origin of watercourses near French River, Ontario; by T. T. Quirke..... 267

MARCH

Correlation of Late Pleistocene marine and glacial deposits of New Jersey and New York; by Paul MacClintock and Horace G. Richards..... 289
Geology and paleontology of the Georges Bank Canyons
Part I. Geology; by Henry C. Stetson..... 339
Part II. Upper Cretaceous fossils from Georges Bank (including species from Banquereau, Nova Scotia); by Lloyd William Stephenson..... 367
Part III. Cretaceous bryozoan from Georges Bank; by R. S. Bassler..... 411
Part IV. Cretaceous and Late Tertiary foraminifera; by Joseph A. Cushman 413
Continental shelf sediments off the mid-Atlantic States; by F. P. Shepard and G. V. Cohee 441

APRIL

Correlation of Arizona Paleozoic formations; by A. A. Stoyanow..... 459
Study in the Jurassic of Wyoming; by C. H. Crickmay..... 541
Continental upper Devonian of northeastern Pennsylvania; by Bradford Willard 565
Walcott's "Pre-Cambrian Algonkian algal flora" and associated animals; by Carroll Lane Fenton and Mildred Adams Fenton..... 609
Early pre-Cambrian varved slate in northwestern Ontario; by F. J. Pettijohn.. 621

MAY

Volcanic history of the Clear Lake area, California; by Charles L. Anderson.... 629
Lacolle conglomerate: A new Ordovician formation in southern Quebec; by T. H. Clark and H. W. McGerrigle..... 665
Apparatus to secure core samples from the ocean bottom; by Charles Snowden Piggot 675
Structural and petrologic studies in Dutchess County, New York.
Part I. Geologic structure of sedimentary rocks; by Robert Balk..... 685

JUNE

Page

Structural and petrologic studies in Dutchess County, New York.
Part II. Petrology and metamorphism of the Paleozoic rocks; by Tom. F. W. Barth 775
Summary of marine Eocene sequence of western North America; by B. L. Clark and H. E. Vokes 851
Studies of certain Alaskan glaciers in 1931; by C. K. Wentworth and L. L. Ray 879
Buried pre-Cambrian surface in the United States; by Rycroft G. Moss 935

ILLUSTRATIONS

PLATES

NEWHOUSE:

Plate 1—Pyrite in granites 36
" 2—Pyrite in diorites 37
" 3—Pyrite in gabbros, diabase, and norite 38
" 4—Globular masses of early sulphides in andesites, and two later masses 39
" 5—Globular masses of early sulphide in diorites 40
" 6—Globular masses of early sulphides and other minerals in gabbro 41
" 7—Pyrrhotite crystals in leucite basalt and syenite, and late chalcopyrite in basalts 42
" 8—Pyrite and late chalcopyrite in granites 43
" 9—Late pyrrhotite-pentlandite-chalcopyrite in gabbros 44
" 10—Late pyrrhotite-pentlandite-chalcopyrite in norites 45
" 11—Opaque oxide exsolution intergrowths in granites 46
" 12—Opaque oxide intergrowths in anorthosite and diabase 47
" 13—Graphic and subgraphic intergrowths of opaque oxides with silicates, and ilmenite crystals in gabbro, diabase, and basalt 48
" 14—Late magnetite and magnetite-ilmenite in basalts 49
" 15—Late magnetite-ilmenite and ilmenite in gabbro 50
" 16—Late magnetite-ilmenite in hypersthene gabbro (norite) and diabase 51
" 17—Globular masses of pyrrhotite-pentlandite and pyrrhotite in opaque oxides present in "titaniferous iron ores" and nickel-bearing pyrrhotite deposits 52
" 18—Tables showing major and most of the minor opaque oxides and sulphides in common igneous rocks 52

VALENTINE:

Plate 1—Geological map and cross-sections of a portion of the Cananea Mountains 53

LOVERING:

Plate 1—Curves showing change in temperature at contact of dike with wall rock of different thermal properties 94
" 2—Curves showing initial contact temperatures for bodies of different thermal properties 98

STARK AND BEHRE:

Plate 1—Geological map of Tomichi Dome and its environs 101
" 2—Tomichi Dome and Crookton thrust 104
" 3—Textural nature of main igneous mass of Tomichi Dome 105

WILLIAMS:

Plate 1—Necks and dikes in Monument Valley 130
" 2—The Shiprock neck 131
" 3—Hopi and Navajo necks 154
" 4—Hopi lake beds and Buell Park 155

Facing page

OSBORNE:

Plate 1—Granulites and amphibolites 197
" 2—Geological-structural map of the Shawinigan Falls district..... 204
" 3—Quartzite 224
" 4—Gneiss and quartzite 225
" 5—Serpentine, pegmatite, gneiss 226
" 6—Gabbro and granulite 227

CARMAN:

Plate 1—South wall of the Holland Quarry..... 253

QUIRKE:

Plate 1—Key and Henvey inlets..... 276
" 2—French and Pickerel rivers..... 277
" 3—Delamere Hills and French River..... 280
" 4—Potholes 281

MACCLINTOCK AND RICHARDS:

Plate 1—Jacob sand and Jerseyan till..... 298
" 2—Jacob sand and coquina fragment..... 299

STETSON:

Plate 1—Figure 1, Dredge used in obtaining samples from canyon walls.... 340
" 2, Erosional processes 340
" 2—Portion of Bright Angel quadrangle..... 341
" 3—Contour map of the three canyons..... 352

STEPHENSON:

Plate 1—Upper Cretaceous fossils from Georges Bank..... 406
" 2—Upper Cretaceous fossils from Georges Bank..... 407
" 3—Upper Cretaceous fossils from Georges Bank and Banquereau 408
" 4—Upper Cretaceous fossils from Banquereau..... 409
" 5—Upper Cretaceous fossils from Banquereau..... 410

CUSHMAN:

Plate 1—Specimens from Cretaceous greensand of Canyon II, Tow 6..... 436
" 2—Specimens from the late Tertiary greensand of Canyon III, Tow 9. 437
" 3—Specimens from the late Tertiary greensand of Canyon III, Tow 9. 438
" 4—Specimens from late Tertiary greensand and silts of canyons II and III 439
" 5—Specimens from the late Tertiary green silts..... 440

SHEPARD AND COHEE:

Plate 1—Distribution of the samples..... 444
" 2—Histogram map 450
" 3—"Iso-megathy" map 452
" 4—Sediment-distribution map 456

STOYANOW:

Plate 1—Devonian fishes and Upper Cambrian trilobites..... 540

CORRECTIONS AND EMENDATIONS

Contributors to Volume 47 have been invited to send corrections and emendations to be made in their paper, and the volume has been scanned with some care. Corrections and insertions are as follows:

Page 7, *insert* numbers 1, 2, 3, and 4 respectively at top of dotted vertical lines in Figure A; numbers 1, 2, and 3 respectively at top of vertical lines in Figure B; and numbers 1 and 2 at top of vertical lines in Figure C.

" 24, *label* units in Figure 2 A, B, C, D, and E respectively.

" 45, Figure 4, line 2, last two words should read lower left. Figure 5 should read Figures 5-6.

" 291, line 20, *for* The current classification, *read* a current classification.

" 344, line 9 from bottom, formula should read $So = \sqrt{\frac{Q^1}{Q^2}}$.

" 369, line 6, 2nd column of list, for *Crinocardium* read *Criocardium*.

" 385, 2nd line, 1st column, for *Parasmelia,* read *Parasmilia.*

" " line 15 from bottom, " " " "

" 386, center heading " " " "

" " line 6 from bottom, " " " "

" 390, line 12 from bottom, *for* opaque, *read* oblique.

" 403, 2nd line, under *Remarks, for* deposit, *read* deposits.

" 408, Figure 11, for *Parasmelia,* read *Parasmilia.*

" 425, line 12 from bottom, for *Anomalina carinata,* read *Anomalina coronata.*

" 432, last line, for *Anomalina carinata,* read *Anomalina coronata.*

" 472, line 3 from top, *for* crystoid *read cystoid.*

" 479, line 8 from bottom, *for* middle *read* Middle.

" 481, 483, 484, for *Rafistoma* and *Rafistomina,* read *Raphistoma* and *Raphistomina.*

" 487, line 17 from bottom, *for* Famenian, *read* Famennian.

" 490, delete line 8 and substitute *soni* Edwards and Haime and *Pachyphyllum Woodmani* (White).

" 504, line 7 from top, *delete* of origin.

" 510, line 9 from bottom, *for* verneuiliana read *verneuiliana.*

" 523, line 2 from top, omit *Squamularia perpleza* (McChesney).

" 529, line 19 from top, *for* invesi, *read* ivesi.

" 534, line 12 from bott n, for *Brogniartites,* read *Brongniartites.*

" 545, line 10 from bottom, *delete* "Sundance Formation."

" 606, for Dker read Dkcr.

" 685, Plate 1, last line of statement under legend at bottom of map, *for* 13, 15, *read* 9, 11, 13-15.

PUBLICATIONS OF THE GEOLOGICAL SOCIETY OF AMERICA

BULLETIN

General Statement

The Society issues monthly a serial octavo publication entitled BULLETIN OF THE GEOLOGICAL SOCIETY OF AMERICA, the edition being 1500 copies. This is sent without charge to Fellows, Correspondents, and Exchanges. Each author receives fifty copies of his paper without cost, and is permitted to order any additional number at cost. Extra copies of these brochures and of the complete monthly issues may be obtained from the Secretary at the prices quoted in each volume.

The subscription price of the BULLETIN is ten dollars ($10.00) per volume. Subscriptions are payable in advance, with a discount of twenty-five (25) per cent to Fellows and Correspondents of the Society.

The price of the index to volumes 1–10 is $2.25; to volumes 11–20, $3.50; to volumes 21–30, $4.00; to volumes 31–40, $4.00. No reduction is made to dealers. Orders should be addressed to the Secretary, 419 West 117 Street, New York, N. Y., and drafts and money orders should be made payable to *The Geological Society of America*.

CONTENTS

JULY

Evolution of the Coahuila Peninsula, Mexico:

Page

Part I. Relation of structure, stratigraphy, and igneous activity to an early continental margin; by L. B. Kellum, R. W. Imlay, and W. G. Kane 969
Part II. Geology of the mountains bordering the valleys of Acatita and Las Delicias; by W. A. Kelly 1009
Part III. Geology of the mountains west of the Laguna district; by Lewis B. Kellum 1039
Part IV. Geology of the western part of the Sierra de Parras; by Ralph W. Imlay 1091
Part V. Igneous phenomena and geologic structure near Mapimí; by Quentin D. Singewald 1153

AUGUST

Sea level and climatic changes related to late Paleozoic cycles; by Harold R. Wanless and Francis P. Shepard 1177
Geologic age of potash deposits; by Ralph L. Rutherford 1207
Ages by the helium method: II. Post-Keweenawan; by William D. Urry 1217
Compressibility of rocks and glasses at high temperatures and pressures: seismological application; by Francis Birch and Richard B. Dow 1235
Revision of type Cambrian formations and sections of Montana and Yellowstone National Park; by Charles Deiss 1257

SEPTEMBER

Petrotectonics at Shawinigan Falls, Quebec; by F. Fitz Osborne and G. Kenneth Lowther 1343
Status of the Talladega series in southern Appalachian stratigraphy; by Geoffrey W. Crickmay 1371
Geology of the Boulder Reservoir floor, Arizona-Nevada; by Chester R. Longwell. 1393
Central Asia in Cretaceous time; by Frederick K. Morris 1477

OCTOBER

Eastern New York Ordovician cherts; by Rudolf Ruedemann and T. Y. Wilson .. 1535
Structure of the earth's crust and the spreading of the continents; by Beno Gutenberg 1587
Fauna of the Pleistocene Pamlico formation of the southern Atlantic Coastal Plain; by Horace G. Richards 1611
Age reclassification of the Frederick Valley (Maryland) limestones; by Anna I. Jonas and George W. Stose 1657

NOVEMBER

Sudbury series; by W. H. Collins 1675
The Sierra Nevada in the light of isostasy; by Andrew C. Lawson 1691
Sedimentation in relation to tectonics; by E. B. Bailey 1713
Igneous geology of the Spanish Peaks region, Colorado; by Adolph Knopf 1727
Stratigraphic evidence bearing on problems of continental tectonics; by Raymond C. Moore 1785

DECEMBER

Page

Mount Mazama: explosion versus collapse; by Warren D. Smith and Carl R. Swartzlow 1809
Hudson gorge in the Highlands; by H. D. Thompson 1831
Stratified drift and deglaciation of eastern Washington; by Richard Foster Flint .. 1849
Ring-dike complex of the Belknap Mountains, New Hampshire; by David Modell. 1885
Lower Algonquin beaches of Penetanguishene Peninsula; by George M. Stanley .. 1933
Serpentinization of Vermont ultrabasics; by George W. Bain 1961

Discussions 1981

CORRECTIONS AND EMENDATIONS

Contributors to Volume 47 have been invited to send corrections and emendations to be made in their paper, and the volume has been scanned with some care. Corrections and insertions are as follows:

Page 1013, last line, *for* (Pl. 7), *read* (Pl. 8).
" 1021, last line, third paragraph, *add* and some samples assayed more than half an ounce of gold per ton.
" 1042, lines 4 and 5, *for* expression of, *read* expression and of.
" 1113, footnote 15, *for* Paleontogr., *read* Palaeontolog.
" 1151, last line, *for* Paleontogr., *read* Palaeontolog.
" 1181, *reverse* title of Figure 1 with title of Figure 3 (p. 1185).
" 1181, line 3 from bottom, *for* B-F, *read* B-E.
" 1239, line 26, *add* the porosity of the Solenhofen limestone, as determined by weighing the massive rock and the powdered rock, was found to be 3.9%. The authors owe this determination to Dr. F. A. Gonyer.
" 1254, Table 8, *add* Densities not corrected for thermal expansion.
" 1428, line 33, *for* labeled erroneously, *read* 2 miles west of.
" 1437, line 38, *for* by, *read* of.
" 1438, line 27, *for* (p. 1432), *read* (p. 1433).
" 1445, Plate 10 caption, *for* Fortification Rock, *read* Fortification Hill.
" 1450, line 10, *for* (p. 1442), *read* (p. 1443).
" 1457, line 22, *for* Pl. 3, *read* Pl. 21.
" 1460, Figure 7 caption, *for* See also . . . , *read* This is . . .
" 1462, line 12, *for* (p. 1432), *read* (p. 1433).
" 1462, line 18, *for* erroneously labeled, *read* 2 miles west of.
" 1468, line 38, *for* (Pl. 3), *read* (Pl. 4).
" 1472, Plate 19, fig. 2, caption, *after* limestone, *insert* and sandstone. Low ridges at right made of Kaibab limestone.
" 1542, Pl. 3, fig. 1, *for* (slide 11), *read* (slide 1).
" 1547, line 12, *for* all chert is not, *read* not all chert is.
" 1567, line 3, *read* figures 6, 33, 35.
" 1567, line 6 from bottom, *for* STYLOSPHAERIDA, *read* *COELOSPHAERIDA*.
" 1568, line 15, *read* figures 34, 36.
" 1584, line 3 from bottom, *read* *Cenosphaera pachyderma* Rüst. Fig. 33: Hypotype.
" 1585, first line, for *primacous*, read *primacvus*.
" 1585, line 14 from bottom, *for* Normanskill, *read* Deepkill.
" 1585, next to last line, *for* Figure 34.—*Choenicosphaera brevispina* nov. Holotype, *read* Figures 34, 36.—*Choenicosphaera brevispina* nov. Figure 34: Holotype. Figure 36: Paratype.
" 1586, line 6, for *Coenicosphaera* read *Choenicosphaera*.
" 1591, line 7 and footnote 7, *for* Jardetsky, *read* Jardetzky.
" 1610, line 9, *for* Fig. 1, *read* Fig. 2.
" 1628, line 13, for *Cummingia tellinoides* Say, read *Cumingia tellinoides* Conrad.
" 1630, in list for *Turnonilla*, read *Turbonilla*.
" 1651, *Rangia cuneata* Gray reported from localities 41, 46, 48, 50, 52, 56 in North Carolina.

Page 1665, footnote 6, *add* E. O. Ulrich and G. Arthur Cooper: *New genera and species of Ozarkian and Canadian brachiopods,* Jour. Paleont., vol. 10, no. 7 (1936) p. 618-620.

" 1667, footnotes 9 and 10, *add* E. O. Ulrich and G. Arthur Cooper: *op. cit.,* p. 620, 621, 627, 628, 629.

" 1753, line 7 from bottom, *for* haüynepnosean, *read* haüyne-nosean.

" 1756, line 2 from bottom, *for* X C, *read* $Z_{\wedge}C$.

" 1759, line 1, *for* C $\wedge$ Z, *read* $Z_{\wedge}C$.

" 1765, *add* BaO..... 0.31, to analysis I.

" 1771, line 17, *for* Santa Clara River, *read* Santa Clara Creek.

" 1817, footnote 6, *add* fig. 3.

" 1820, line 10, *add* On closer study another interpretation of the flows on Hillman Peak might be necessary.

" 1829, footnote 23, *add* After this eruption of Taal comparatively little large débris was found near the crater. Apparently most of the material was blown into small fragments and carried to great distances. This would seem to meet one of the objections of Diller with reference to finding comparatively little coarse débris on the rim of Crater Lake.

" 1834, line 6 from bottom, and footnote 8, *for* Lowl, *read* Löwl.

" 1839, lines 1 and 2, *delete* Farther . . . southwest.

PUBLICATIONS OF THE GEOLOGICAL SOCIETY OF AMERICA

BULLETIN

General Statement

The Society issues monthly a serial octavo publication entitled BULLETIN OF THE GEOLOGICAL SOCIETY OF AMERICA, the edition being 1500 copies. This is sent without charge to Fellows, Correspondents, and Exchanges. Each author receives fifty copies of his paper without cost, and is permitted to order any additional number at cost. Extra copies of these brochures and of the complete monthly issues may be obtained from the Secretary at the prices quoted in each volume.

The subscription price of the Bulletin is ten dollars ($10.00) per volume. Subscriptions are payable in advance, with a discount of twenty-five (25) per cent to Fellows and Correspondents of the Society.

The price of the index to volumes 1–10 is $2.25; to volumes 11–20, $3.50; to volumes 21–30, $4.00. No reduction is made to dealers. Orders should be addressed to the Secretary, 419 West 117 Street, New York, N. Y., and drafts and money orders should be made payable to *The Geological Society of America.*

PROCEEDINGS

General Statement

Beginning with volume 45, the Proceedings of the annual meeting are published as a separate volume, containing the business of the meeting, the reports of standing committees, the abstracts of papers presented, and the memorials to deceased members. The edition is 1200 copies. Copies of the Proceedings are sent to Fellows, Correspondents, subscribers, and exchanges, without charge.

Each author of a memorial receives fifty copies of his paper without cost, and is permitted to order any additional number at cost. Copies of the volume and of various parts thereof may be obtained from the Secretary at the prices quoted.

Memoirs

General Statement

The Society publishes at irregular intervals a series of books, bound in red buckram. The edition is 1500 copies. Copies of the Memoirs are sent without cost to Fellows, Correspondents, and exchanges. Extra copies may be obtained from the Secretary at the prices quoted.

Description of the Published Volumes

Memoirs	Pages	Plates	Figures	Price
No. 1. Stratigraphy of western Newfoundland. CHARLES SCHUCHERT AND CARL O. DUNBAR	123	11	8	$2.00
No. 2. Paleozoic plankton of North America. RUDOLF RUEDEMANN	141	26	6	2.00
No. 3. Evolution of the Congo Basin. A. C. VEATCH	183	10	8	1.75
No. 4. Geology in the coastal atlas of western Algeria. ROBERT VAN VLECK ANDERSON	450	19	2	3.50

SPECIAL PAPERS

General Statement

The Society publishes at irregular intervals a series of Special Papers, bound in paper covers. The regular edition is 1500 copies. Copies are sent without cost to Fellows, Correspondents, and exchanges. Extra copies may be obtained from the Secretary at the prices quoted.

Description of the Published Volumes

Special Papers	Pages	Plates	Figures	Price
No. 1. Bibliographic index of Paleozoic ostracoda. R. S. BASSLER AND BETTY KELLETT	500	..	24	$2.50
No. 2. Fossil crustacea of the Atlantic and Gulf Coastal Plain. M. J. RATHBUN	160	26	2	1.25
No. 3. Fossil non-marine mollusca of North America. JUNIUS HENDERSON	313	..	..	1.75
No. 4. Nuculid bivalves of the genus Acila. HUBERT G. SCHENCK	149	18	15	1.25

BIBLIOGRAPHY AND INDEX

General Statement

The Society publishes yearly a series of Bibliographic Contributions, bound in paper covers. The edition is 2500 copies. Copies are sent without cost to Fellows, Correspondents, and exchanges. Extra copies may be obtained from the Secretary at the prices quoted.

Description of the Published Volumes

Volumes	Pages	Price
No. 1. Bibliography and index of geology exclusive of North America. 1933. J. M. NICKLES AND R. B. MILLER	405	$2.00
No. 2. Bibliography and index of geology exclusive of North America. 1934. J. M. NICKLES AND R. B. MILLER	420	1.75
No. 3. Bibliography and index of geology exclusive of North America. 1935. J. M. NICKLES, MARIE SIEGRIST, AND ELEANOR TATGE	408	1.75

History

General Statement

The Society also has on hand a limited number of copies of the book by Herman LeRoy Fairchild, "The Geological Society of America, 1888–1930: a Chapter in Earth Science History," published in 1932 and containing 232 pages and 18 plates. The edition of this book was 1000 copies. Re-issued in 1933, the edition was 300. Copies may be obtained from the Secretary, the cost being $2.50.
